1. Bolivia

The situation in Bolivia was discussed generally. One specific point covered was the character and standing of Time Magazine's stringers in Latin America. Some views were expressed that the quality of these individuals is not as high in that area as in others.

2. Berlin

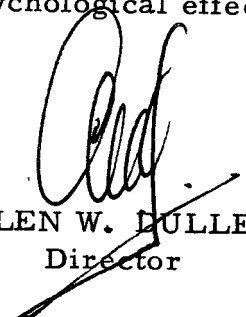

Mr. Harr then raised the question of what if anything the OCB could or should do in connection with the Berlin crisis. The discussion was not particularly conclusive and no firm lines of OCB action were proposed. Mr. Dulles suggested that it might be well to review the various contingency papers prepared by or in coordination with the OCB in the past.

3. Proposal to Display World War II Nuclear Weapons

Mr. Reinhardt said that Representative Porter had written a letter to the AEC reviving the suggestion that models of the Hiroshima

and Nagasaki atom bombs be put on display in the Smithsonian Institution.

The Board once more affirmed its belief that any action of this kind would have most unfortunate psychological effects.
